

Sayfulloh Abduvohidov

Frontend Developer | Web UI & UX Enthusiast | Building Modern Websites

Uzbekistan, Tashkent

(+998) (94) 008-32-13

ABOUT ME

Motivated and fast-learning Frontend Developer with a solid foundation in HTML, CSS, and JavaScript, and growing experience in TypeScript and React. Passionate about creating clean, responsive, and modern user interfaces with a strong focus on usability and performance. I consistently strengthen my skills through real projects, experimenting with UI/UX improvements, problem-solving, and API integration.

I approach every project with a mindset of improvement and deep understanding — not just “making it work” but learning **why** it works. Currently focused on advancing toward a strong mid-level skillset by mastering React, TypeScript, scalable component structures, and real-world frontend patterns.

EXPERIENCE

Freelance Frontend Developer (Remote)

2024.09 – Present

Worked on multiple small-to-medium frontend projects, building responsive UIs, implementing interactive components, and improving overall user experience. Collaborated with clients to convert design ideas into clean, functional web pages using HTML, CSS, and JavaScript. Gained hands-on experience with API integration, reusable components, and basic React/TypeScript workflows while actively developing toward a mid-level skillset.

- Built and customized UI components such as product cards, navbars, and dynamic elements (wishlists, toggles, animations).
- Improved website layout and responsiveness using Flexbox, Grid, and modern CSS techniques.
- Integrated external APIs (REST, JSON) into projects using JavaScript fetch and async functions.
- Optimized code for readability and reusability while learning professional development patterns.
- Communicated with clients to understand requirements and deliver usable, modern UI solutions.

EDUCATION

RESTful API design for HR and analytics dashboards

Self-Taught Frontend Developer (Ongoing)

2023 – Present

Studying HTML, CSS, JavaScript, TypeScript, and React through projects, online resources, and practical exercises. Strong focus on understanding UI/UX, DOM, API integration, and building real project components, also watched some Udemy lessons as additional support and learning with help from my full-stack developer brother.

SKILLS

Frontend: HTML5, CSS3 (Flexbox, Grid, Responsive Design), JavaScript (ES6+), TypeScript (Learning), React (Learning)

UI/UX: Component Design, Layout Structuring, Animations, Modern Styling

API / Data: Fetch API, JSON Handling, Basic REST Integration

Tools: Git, GitHub, VS Code

Styling Frameworks: Bootstrap, Tailwind CSS

Other: Problem Solving, DOM Manipulation, Async Programming, Basic TypeScript Types

LANGUAGES:

Uzbek (native), English (B2), Russian(B2)

PERSONAL PROJECTS

Product Card & Wishlist Feature

Created interactive product cards with heart-toggle wishlist, dynamic badge updates, and conditional rendering using JavaScript.

Multi-Section Website(Home/About Scroll)

Built a website with smooth scrolling navigation and section-based interactions using JS scroll logic.

Random Image Generator

Practiced API-like behavior by rendering different images on refresh or button click.
